Unlimited 56K Dial-up Internet Service

Fastturtle.net, a wholly owned subsidiary of Advanced Integrated Technologies (AiTech), provides fast, reliable and commercial-free dial-up Internet access with over 40,000 access numbers in the US and Canada. We utilize four networks to ensure high quality network redundancy. Redundancy guarantees you fast, high quality connections at all times with no busy signals.

- Unlimited Internet access in most areas
- 5 email accounts with Webmail access
- SPAM email filter option
- Filtered service option
- No contract commitments

Family Safe Filtered Access

Filtered service is a family friendly product that filters out adult and/or offensive content on the Web. Unlike most ISP's, we have taken online safety for children into consideration. Filtered access restricts many different types of online materials from being viewed on your computer screen, including pornography, weapons, etc.

Content that is blocked: ftp, http (Web), nntp (news)	Content that is not blocked: Gopher, WAIS, telnet
Adults Only	Message / BBS's
Drugs	Personals
Sex	Personal Info
Gambling	Alcohol
Tasteless/Gross	Games
Profanity	Chat
School Cheating	Current Events
Suicide / Murder	Jokes & Humor
Weapons	Medical Material
Hate Sites	Tobacco
Illegal	
Lingerie	
Nudity	
Pornography Site Material	

Anti-SPAM Email Filter

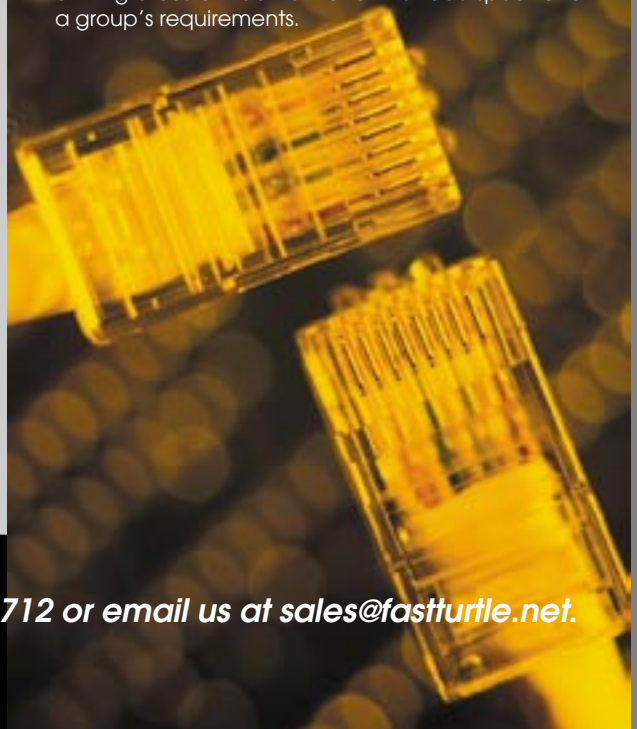

Tag SPAM before it hits your mailbox so that you can filter it using the message rules in your email client. Or, you can have SPAM email dropped so that it is never received.

Why should I market AiTech's dial-up service to my customers?

AiTech's dial-up service is a low-cost, leader in the marketplace. Our monthly pricing plans are more than 50% less than most other national dial-up service providers. Additionally, dial-up service can contribute to boosting your per account compensation. Bundle our dial-up service with other great AiTech products.

Ask about our Affinity Group Programs!

We have the ability to customize Internet service programs for special interest groups. We can provide a custom built Web site for dial-up service utilizing a custom domain and interface specific to a group's requirements.
